1. DFM PROGRAMME OBJECTIVES

. Finance is believed to be the soul of any kind of business trading, manufacturing, services which lead the entire business in the proper direction. Proper management of finance is essential not only to generate good profits but also to run the business smoothly because scarcity of finance will disturb the entire business. Large business houses, manufacturing units, insurance companies, banks keep finance controllers that are normally done by M.B.A. or C.F.A. To control business by such experts is not only a need of large scale business but equally essential in small business, but small businessmen can not afford MBA's or CFA's, so a person who has done such a course can work as finance consultant and it may become a good business opportunity for them.

In the earlier phase probably they have to work under some specialist and with practical experience later on they can start their own consultancy. Even a person doing a job in this field can get a promotion by doing this type of course.

Moreover, finance controlling activities are not only applicable in urban areas, it is equally important in rural areas where farmers have become millionaires. So such a course can be helpful to the students of rural areas.
