FOUNDATION COURSE IN ENGLISH-1 (FEG-01)

Programme: BDP/2013

Course Code: FEG-01

Dear Student,

You are required to do one assignment for the foundation Course in English-01. It is a Tutor Marked Assignment (TMA) and carries 100 marks. It covers four blocks of the course.

Aims:- The TMA is primarily concerned with assessing your proficiency in English. You should not reproduce chunks of information from the passage (s) but effectively use the skills of reading and writing that you may have acquired during the course of study to compose your answers. These assignments aim to teach as well as to assess your performance.

Guidelines:- You will be required to answer the questions on reading comprehension, vocabulary, grammar and composition. For the question on transcribing phonetically, you may consult an appropriate dictionary.

As in day-to-day life, **Planning** is important in attempting the assignment as well. Read the assignment carefully; go through the units on which the questions are based; jot down some points regarding each question and then re-arrange them in a logical order. In the essay-type answer, pay attention to your introduction and conclusion. The introduction must tell you how to interpret the given topic and how you propose to develop it. The conclusion must summarize your views on the topic.

Make sure that your answer :

- a) is logical
- b) is written in simple and correct English
- c) does not exceed the number of words indicated in your questions
- d) is written neatly and clearly.

Que –1 Read the following passage carefully and answer the questions given below. (20)

Most of the oil from a refinery, however, is used for fuel, whether this is petrol, kerosene, diesel oil or heavy fuel oil. These fuels are sent out in many ways, by rail, by road and by water. Sometimes we see the road tankers that bring fresh fuel. We also see lorries carrying drums of kerosene for our lamps and cookers, and farm tractors. When roads are bad, these fuels may be taken by carts drawn by oxen or buffaloes. If transport overland is too difficult, the drums may be taken by boats or the rivers.

We burn oil in the engines of our motor cars and lorries, our aero planes, and some of our trains. We also burn it in oil lamps and cooking stoves. When we burn oil in any of these ways, we use the energy that is inside it. It is this energy which drives the engines, gives out light and cooks food.

Questions:

1. What are the different fuels?
2. How are these fuels sent out in our country?
3. What are the uses of oil?
